

MARTIN SALTBOX

AL-VI-B-074
Railroad Street, Midland
ca. 1860

The Martin House is a one and a half story, four bay wide saltbox. The house is an example of a "block" or a two family dwelling constructed by a coal company in the second half of the 19th century. It is an especially good example since it has been altered little since its original construction.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Martin Saltbox is located on the east side of Railroad Street in Midland, Allegany County near the Route 36 intersection.

The building basically consists of a two story, four bay wide, frame structure of the Saltbox design. The facade is covered with beveled siding and is supported by a low stone foundation, with a plain water table. The roof of the structure is gabled with a rear shed roof wing and is covered with replaced asphalt materials. The eaves of the structure feature the original rafter ends with no trim. Windows in the house include double hung wooden sash frames with six over six lights, while on the front second story single sash frames are exhibited with six lights and wooden cornices. There are two entrances to the structure on the front western side, giving evidence to the fact that it originally was a double house. The entrances feature the original verticle paneled doors with plain trim. The house includes a three bay end porch. The porch exhibits a hipped roof supported by square columns with cushion capitals and steps lead to the porch level. Two brick chimneys, which appear to be original, are located; one to the interior of shed wing and one centrally to the gabled block.

The house is structurally sound and retains much of its original appearance.

STATEMENT OF SIGNIFICANCE

The Martin Saltbox is typical of a "block or a two family dwelling constructed by a coal company in the second half of the 19th century. These houses ~~were~~ usually one and a half stories high with a roofed porch across the front of the house. There were no cellars but the houses were set on low stone foundations. The frame was constructed of timbers mortised and tenoned together with horizontal whitewashed weatherboard on the outside. Inside rooms were plastered and painted. Each unit consisted of three rooms on the first floor and one on the second with a brick chimney running up through the middle providing each tenant with two fireplaces. Double houses built by the Midland Coal and Iron Company in 1856 cost about \$400.¹
